

 **SCOSCHE**[®]
ACCESSORIES FOR LIFE[™]

2017 PRODUCT GUIDE

Products Created for the Outdoor Enthusiast.

At Scosche[®], we find our inspiration in the local lifestyle, culture, music and people. Our designers and engineers develop products that reflect our rich heritage in audio, a legacy that dates back to 1980. These influences can be found in our award-winning products bringing a taste of California and west coast lifestyle to people across the globe.

We live in an age driven by technology and connectivity. Smartphones are firmly grasped by people on the subway and skaters passing by. Tablets rest carefully on coffee shop counters and dorm room desks. Our lives move faster each day and we find comfort in knowing that information is only a tap, click, Siri[®] or Google[®] Assistant search away. That's why we make consumer tech products that are genuinely ***Accessories for Life[®]*** and ***Optimized for Outdoors[®]***.

STUCKUP Qi

Wireless Charging Universal
Window/Dash Mount

WDQM

Expanding to fit most of today's smartphones, these mounts provide the ultimate convenience of charging your device wirelessly while you drive. These wireless charging mounts receive power from your vehicle's 12v power socket.

- Expands to hold devices up to 3.5" wide.
- Ensures maximum compatibility with both current and future Qi-enabled devices.
- Works great with Qi-enabled phones, cases, receivers and battery covers.

TYPE-C™

USB Type-C™/USB-C™ is the future of USB technology. The new Type-C connector is a revolution in design and operability. It features a slim connector design specifically tailored to emerging products across the mobile communications and computing spectrum. The connector is reversible and therefore is able to be inserted either side up for added convenience. With USB-C cables, you not only get the usual charge & sync functionality, but also power delivery and, depending upon the USB specification of the cable, blazing data transfer speeds.

SuperSpeed USB brings significant performance enhancements to the USB standard, while remaining compatible with the billions of USB enabled devices currently in the market. SuperSpeed USB will deliver 10x the data transfer rate of Hi-Speed USB, as well as improved power efficiency. SuperSpeed USB is backwards compatible with USB 2.0.
