PREMIUM INSTALLATION SOLUTIONS

**2018**

# INTEGRATED TOUCHSCREEN SOLUTIONS 2.0

**Scosche®** is the leader of in dash vehicle integration products having introduced the first generation of these ITC installation kits in 2012 using older button technology. From the very beginning, these kits featured many patent pending innovative features. This plug-and-play ITC 2.0 dash kit allows easy replacement of the vehicle's factory stereo to any aftermarket DIN or Double DIN unit. This dash kit is the first of its kind to include a dual, full-color touch screen system to control the vehicle's air conditioning, as well as other vehicle technology systems and convenience features. The kit requires no complex programming or cutting of any of the OEM wiring in the vehicle during installation.
