The Steinjäger Rear Sway Bar is constructed from heavy duty 1.050 inch OD x 0.109 inch Wall A513-Type 1 Tubing to help stiffen up the suspension of your Jeep. The Sway Bar is **powder coated** and includes the polyurethane mounting bushings. Our oversized rear sway bar design helps eliminate unwanted body roll. Disconnect the end links attached to this sway bar before serious rock crawling or off-roading. Otherwise, because of the large diameter, articulation will be reduced and hinder your off-road experience. Made in the USA.
